## **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 4, 5, 9, 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Lee et al (US 5201721). Lee discloses a safety needle comprising a receiver 20, a protective cap 28, the receiver being movably disposed in the protective cap from a closed position to a functional position. The receiver has a tab 26 that corresponds to a groove 38 in the inner jacket surface of the cap. The device is a syringe and a hypodermic needle. See Figs. 1-3.

## Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 2, 3, 7, 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lee in view of Grabis et al (US 6322540). Claims 2 and 7 differ from Lee in calling for a clip ring.

Art Unit: 3763

The limitations of claims 3 and 8 are disclosed by Lee as discussed above. Grabis teaches a safe

needle device comprising a protective cover 7 and a ring 11 that acts as a stop to prevent motion

of the receiver past a certain point on the cover. Therefore, it would have been obvious to one of

ordinary skill in the art at the time of invention to modify the device of Lee to include a ring as

taught by Grabis so that the cover does not inadvertently move too far in one direction past the

receiver.

5. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lee in view of

Olovson (US 2002/0193749). Claim 6 differs from Lee in calling for a membrane to seal the

opening when the cover is in a closed position. Olovson teaches a needle protector 2'

comprising a membrane 2b that seals off the opening of the protector while in the closed position

to prevent contamination of the needle prior to use (Page 4, paragraph 0075). Therefore, it

would have been obvious to one of ordinary skill in the art at the time of invention to modify the

device of Lee to include a membrane as taught by Olovson to prevent contamination of the

needle prior to use.

Conclusion

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Laura A. Bouchelle whose telephone number is 571-272-2125.

The examiner can normally be reached on Monday-Friday 8-4.

Application/Control Number: 10/802,354 Page 4

Art Unit: 3763

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nicholas Lucchesi can be reached on 517-272-4977. The fax phone number for the

organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would

like assistance from a USPTO Customer Service Representative or access to the automated

information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
